

Scenario:

You are a premed student and need help staying on time with classes. You come across this app and create your class schedule.

Task 1: Create an account and a schedule with the Class Tracker.

Monday:

Spanish 8:30am-9:30 am

Chemistry 10:50am-12:50pm

Tuesday:

Chemistry 8:30am-9:45am

Biology 2:50pm—4:05pm

Wednesday:

Spanish 8:30am-9:30am

Chemistry 9:40am-10:50am

Thursday:

Chemistry 8:30am-9:45am

Biology 2:50pm-4:05pm

Friday:

Spanish 8:30am-9:45am

Task 2: You save the schedule and set the alarms for the times to wake up and times you should leave. You also enable location sharing so that way the app can notify you to leave due to traffic. You can also update the side tasks with your current assignments and the app will remind you when the assignments are due.

Task 3: You saved the schedule as Kaytlins schedule. Find this schedule again you give a 5/5 rating.

Notes:

Changes you would make is:

1. that you should be able to change the sounds for the alarm
2. Have certain requirements for the passwords for the accounts
3. More customization options

Things you should keep are:

1. Reminders for assignments
2. Navigation for the classes
3. Alarms for when to wake up
